Alex Morgan - Senior Backend Engineer

Email: alex.morgan@techmail.com | Phone: +1 555-0182 | Location: Austin, TX

Notice Period: 2 weeks

Summary

Passionate Senior Backend Engineer with 6 years of experience building resilient distributed microservices, REST APIs, and database architecture using Python, FastAPI, PostgreSQL, Docker, and AWS.

Core Technical Skills

- Languages & Frameworks: Python, FastAPI, Django, PostgreSQL, Redis, SQL
- DevOps & Infrastructure: Docker, Kubernetes, AWS (EC2, S3), Git, Linux
- Principles: REST API design, Microservices, CI/CD, Agile/Scrum

Experience

Senior Software Engineer | CloudTech Solutions (2021 - Present)

- Architected high-throughput FastAPI services processing over 10M daily requests.
- Reduced database query latency by 45% using Redis caching and PostgreSQL indexing.

Backend Developer | DataFlow Inc (2018 - 2021)

- Developed Python microservices for data processing pipelines and analytics dashboards.

Education

Bachelor of Science in Computer Science - University of Texas at Austin (2018)
